1- Basis of presentation:

The unaudited consolidated balance sheet as of March 31, 2002 and the related unaudited consolidated statements of operations and deficit and cash flows for the three month periods ended March 31, 2002 and 2001, have been prepared using accounting principles and practices consistent with those used and described in the annual financial statements, but do not include all disclosures required by generally accepted accounting principles. Accordingly, they should be read in conjunction with the Company's audited consolidated financial statements and notes thereto as of and for the year ended December 31, 2001 included in the Company's annual report to shareholders.

2- Change in Accounting Policy

Effective January 1, 2002, the Company adopted the new Recommendations of Canadian Institute of Chartered Accountants with respect to the accounting for stock-based compensation and other stock-based payments. The new Recommendations are applied prospectively to all stock-based payments to non-employees, and to employee awards that are direct awards of stock, call for settlement in cash or other assets, or are stock appreciation rights that call for settlement by the issuance of equity instruments, granted on or after January 1, 2002.

The Company accounts for all stock-based payments to non-employees, and employee awards that are direct awards of stock, call for settlement in cash or other assets, or are stock appreciation rights that call for settlement by the issuance of equity instruments, granted on or after January 1, 2002, using the fair value based method. No compensation cost is recorded for all other stock-based employee compensation awards. Consideration paid by employees on the exercise of stock options is recorded as share capital.

Under the terms of the JV agreement, ProMetic and the American Red Cross will each contribute intellectual property and technical expertise to develop diagnostic and removal systems. Specifically, the JV will utilize ProMetic's proprietary Mimetic Ligand™ technology in combination with the American Red Cross' expertise in diagnostics and pathogen removal systems in blood and blood components. The JV will also investigate developing other commercial applications for detecting and removing TSEs for industries such as biopharmaceuticals, food, cosmetics and personal care. This JV, of which ProMetic owns 26% (the cost of this placement is \$4,190), started its operations in the second quarter of 2002.

Pursuant to the terms of the agreement and as part of its ongoing R&D budget, ProMetic included an allocation of US\$ 2.3 Million over the next two years to be contributed in cash, services and in kind to PRDT.
