

Job Opportunity

Plasma Control Coordinator

Prometic Bioproduction Inc. (“PBP”) undertakes the development and manufacture of high-value plasma-derived therapeutic biosimilars for Prometic’s current and future clients in a state of the art facility.

Prometic Bioproduction Inc. is experiencing substantial growth. In order to support operations expansion, the Quality department of PBP is looking for a Plasma Control Coordinator, to work at its plant in Laval, Quebec. Under the supervision of the Quality Control Manager, the Plasma Control Coordinator will be responsible for the reception, the inspection and the release of plasma (raw material). The Plasma Control Coordinator will perform quality control with respect to cGMPs requirements.

The mandate of the Plasma Control Coordinator will namely include the following responsibilities:

- Manage reception, inspection, storage and release of plasma, serving as starting material for manufacturing;
- Manage plasma inventory;
- Assist in GMP material reception, inspection and release;
- Participate to QC lab purchasing;
- Other related duties/responsibilities as required or assigned by the supervisor.

The selected candidate will hold a Collegial Degree in Sciences with at least one (1) year of relevant experience in the pharmaceutical industry. Good verbal and written communication skills in English and French is required.

The following criteria are also required:

- Ability to work independently with minimal supervisory guidance;
- Strong teamwork;
- Flexibility;
- Autonomy;
- Organization skills.

Prometic offers a competitive compensation, a flexible work schedule and a casual working environment.

To apply, please send a cover letter and copy of your resume to hr@Prometic.com with the following reference: PCC-PBP. Prometic is an equal opportunity employer. **Only chosen candidates will be contacted for an interview.** For more information about Prometic, visit our website www.Prometic.com.
